Product Fact Sheet

Hospital Management

Product Overview

Hospital management software streamlines administrative, clinical, and financial tasks in healthcare facilities. It includes features like patient records, scheduling, billing, inventory, and reporting for efficient hospital operations and patient care.

PRODUCT FEATURES

Patient Registration	Capture and manage patient demographics, contact information, and insurance details.
Appointment Scheduling	Enable staff to schedule patient appointments efficiently, manage appointment calendars, and send appointment reminders.
Electronic Health Records (EHR)	Store and manage comprehensive electronic health records, including medical history, diagnoses, medications, and treatment plans.
Billing and Invoicing	Automate billing processes, generate invoices, and manage payments, insurance claims, and reimbursement tracking.
Inventory Management	Track and manage medical supplies, equipment, and pharmaceuticals, including inventory levels, ordering, and stock alerts.
Lab and Radiology Management	Manage laboratory tests, imaging orders, and results, including specimen tracking and integration with diagnostic equipment.

Product Fact Sheet

Hospital Management

Product Overview

Hospital management software streamlines administrative, clinical, and financial tasks in healthcare facilities. It includes features like patient records, scheduling, billing, inventory, and reporting for efficient hospital operations and patient care.

PRODUCT FEATURES

Patient Portal	Provide patients with secure online access to their health records, appointment scheduling, test results, and communication with healthcare providers.
Staff Management	Maintain staff records, manage schedules, assign tasks, and track attendance for healthcare professionals and administrative staff.
Document Management	Store and organize documents such as consent forms, treatment plans, and medical imaging reports in a centralized digital repository.
Reporting and Analytics	Generate reports on various aspects of hospital operations, including patient demographics, financial performance, and clinical outcomes.
Compliance and Regulatory Support	Ensure compliance with healthcare regulations and standards such as HIPAA, GDPR, and Meaningful Use requirements.
Integration with External Systems	Seamlessly integrate with other healthcare systems, such as laboratory information systems (LIS) and picture archiving and communication systems (PACS).
