

Product Fact Sheet

ONLINE EXAM

Product Overview

Online exam software facilitates creation, administration, and assessment of exams. Features include question bank, customizable exams, security measures, remote proctoring, scoring, analytics, accessibility, integration, mobile support, and technical assistance.

PRODUCT FEATURES

User Management	Allow administrators to create and manage user accounts for students, teachers, and administrators, with varying levels of access and permissions.	
Question Bank	A repository where educators can store, organize, and manage questions for exams. It should support various question types such as multiple-choice, true/false, short answer, essay, etc.	
Exam Creation	Enable educators to create exams by selecting questions from the question bank, setting time limits, specifying grading criteria, and configuring other parameters.	
Customization	Provide options for customizing exams with different formats, layouts, instructions, and branding elements to match the institution's requirements.	
Security	Implement security measures to prevent cheating and ensure the integrity of exams. This may include features like randomized question orders, timer controls, lockdown browsers, and plagiarism detection.	
Remote Proctoring	Integration with remote proctoring tools or built-in proctoring features to monitor students during exams, including webcam monitoring, screen recording, and identity verification.	

Product Fact Sheet

ONLINE EXAM

Product Overview

Online exam software facilitates creation, administration, and assessment of exams. Features include question bank, customizable exams, security measures, remote proctoring, scoring, analytics, accessibility, integration, mobile support, and technical assistance.

PRODUCT FEATURES

Scoring and Grading	Automatically grade objective questions and provide instant feedback to students. Allow manual grading for subjective questions and provide tools for efficient grading.	
Analytics and Reporting	Generate detailed reports and analytics on exam results, including performance metrics, item analysis, and student progress tracking.	
Accessibility	Ensure that the platform complies with accessibility standards, providing features like screen reader compatibility, keyboard navigation, and adjustable font sizes for students with disabilities.	
Integration	Integrate with Learning Management Systems (LMS), Student Information Systems (SIS), and other educational platforms to streamline data exchange and workflows.	
Mobile Compatibility	Support access to exams on mobile devices, with responsive design and native mobile apps for iOS and Android platforms.	
Feedback and Survey	Allow students to provide feedback on exams and instructors through surveys, helping improve the quality of assessments and teaching.
