

Product Fact Sheet

# Pharmacy Management

Product Overview

Pharmacy management software automates prescription processing, inventory management, billing, and patient records in pharmacies. It improves efficiency, accuracy, and compliance while enhancing customer service and medication management.

PRODUCT FEATURES

|                              |  |
|------------------------------|--|
| Prescription Management      | Process prescriptions electronically, including receiving, filling, and dispensing medications, and provide alerts for drug interactions and allergies.          |
| Inventory Management         | Track and manage medication inventory levels, expiration dates, stock movement, and supplier information to prevent stockouts and minimize wastage.              |
| Point-of-Sale (POS) System   | Handle retail transactions, including cash and insurance payments, and integrate with payment processing systems for seamless checkout experiences.              |
| Patient Profiles             | Maintain comprehensive patient records, including medication history, allergies, and insurance information, to ensure accurate dispensing and personalized care. |
| Billing and Insurance Claims | Generate invoices, manage insurance claims, and facilitate reimbursement processes, including electronic submission to insurance providers for faster payments.  |
| Drug Database                | Access an extensive database of medications, including drug information, dosages, and interactions, to support accurate dispensing and counseling.               |

Product Fact Sheet

# Pharmacy Management

Product Overview

Pharmacy management software automates prescription processing, inventory management, billing, and patient records in pharmacies. It improves efficiency, accuracy, and compliance while enhancing customer service and medication management.

PRODUCT FEATURES

|                                   |   |
|-----------------------------------|---|
| Pharmacist Workflow Tools         | Streamline pharmacist workflows with features such as prescription queuing, order prioritization, and task management for efficient dispensing processes. |
| Barcode Scanning                  | Utilize barcode scanning technology to quickly and accurately identify medications, update inventory records, and reduce errors in dispensing.            |
| Reporting and Analytics           | Generate reports on pharmacy performance, inventory metrics, sales trends, and medication adherence to inform decision-making and improve operations.     |
| Compliance and Regulatory Support | Ensure compliance with pharmacy regulations and standards, such as HIPAA, FDA requirements, and DEA regulations for controlled substances.                |
| Drug Interaction Checking         | Perform real-time checks for potential drug interactions and contraindications to enhance patient safety and prevent adverse drug events.                 |
| Pharmacy Workflow Integration     | Seamlessly integrate with pharmacy automation systems, such as dispensing robots and prescription refill kiosks, to optimize workflow efficiency.         |

Product Fact Sheet

# Pharmacy Management

Product Overview

Pharmacy management software automates prescription processing, inventory management, billing, and patient records in pharmacies. It improves efficiency, accuracy, and compliance while enhancing customer service and medication management.

PRODUCT FEATURES

Patient Communication Tools

Communicate with patients via SMS, email, or mobile apps to provide medication reminders, refill notifications, and educational resources.

Security and Data Privacy

Implement robust security measures to protect patient data, including encryption, access controls, and compliance with privacy regulations.

Mobile App Integration

Offer mobile applications for patients to request refills, access medication information, and communicate with pharmacists for convenient pharmacy services.
