

Product Fact Sheet

Real Estate Management

Product Overview

Real estate management software streamlines property management tasks such as leasing, rent collection, maintenance scheduling, and tenant communication. It centralizes data, automates processes, and enhances efficiency for property managers.

PRODUCT FEATURES

Property Listing Management	Organizes and updates property listings with details like images, descriptions, and amenities.	
Tenant Management	Tracks tenant information, leases, payments, and communication history.	
Rent Collection	Automates rent collection processes, including invoicing, reminders, and online payment options.	
Maintenance Requests	Allows tenants to submit maintenance requests online, with tools to track and manage requests efficiently.	
Accounting and Financial Management	Manages property finances, including expense tracking, budgeting, and generating financial reports.	
Lease Management	Facilitates lease creation, renewal, and management, with options for document storage and electronic signatures.	

Product Fact Sheet

Real Estate Management

Product Overview

Real estate management software streamlines property management tasks such as leasing, rent collection, maintenance scheduling, and tenant communication. It centralizes data, automates processes, and enhances efficiency for property managers.

PRODUCT FEATURES

Document Management

Stores and organizes important documents such as leases, contracts, and inspection reports securely.

Reporting and Analytics

Provides insights into property performance, occupancy rates, rental income, and expenses through customizable reports.

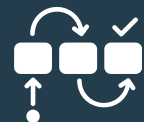

Vendor Management

Manages relationships with vendors, contractors, and service providers for maintenance and repairs.

Task and Workflow Automation

Automates repetitive tasks and workflows such as lease reminders, maintenance scheduling, and invoice generation.

Communication Tools

Facilitates communication between property managers, tenants, and owners through email, messaging, or portal notifications.

Vacancy Management

Tracks and advertises vacant units, manages tenant turnover, and streamlines the leasing process.

Product Fact Sheet

Real Estate Management

Product Overview

Real estate management software streamlines property management tasks such as leasing, rent collection, maintenance scheduling, and tenant communication. It centralizes data, automates processes, and enhances efficiency for property managers.

PRODUCT FEATURES

Compliance Management

Helps ensure compliance with local regulations, fair housing laws, and property management standards.

Mobile Access

Provides mobile apps or responsive web interfaces for property managers and tenants to access information and perform tasks on the go.

Integration Capabilities

Integrates with other software systems such as accounting software, CRM systems, or marketing platforms to streamline operations and data exchange.
