

Product Fact Sheet

School Management

Product Overview

School management software facilitates administrative tasks like student enrollment, attendance tracking, grading, and communication. It streamlines operations, enhances collaboration, and improves efficiency for educational institutions.

PRODUCT FEATURES

Student Information Management

Stores and manages student profiles, including personal details, enrollment history, and academic records.

Attendance Tracking

Records and tracks student attendance electronically, with options for manual entry or integration with biometric systems.

Gradebook Management

Allows teachers to input grades, calculate averages, and generate reports for student progress.

Timetable/Scheduling

Allows tenants to submit maintenance requests online, with tools to track and manage requests efficiently.

Parent and Teacher Portals

Provides portals for parents and teachers to access student information, grades, attendance, and communicate with each other and school staff.

Online Admissions

Streamlines the admissions process by accepting online applications, managing documents, and tracking application status.

Product Fact Sheet

School Management

Product Overview

School management software facilitates administrative tasks like student enrollment, attendance tracking, grading, and communication. It streamlines operations, enhances collaboration, and improves efficiency for educational institutions.

PRODUCT FEATURES

Fee Management

Manages student fees, including billing, invoicing, payment tracking, and generating financial reports.

Communication Tools

Facilitates communication between administrators, teachers, parents, and students through announcements, emails, and messaging systems.

Library Management

Tracks library inventory, loans, returns, and overdue items, with options for online catalog access and reservations.

Examination Management

Manages exam schedules, seating arrangements, and result processing, with options for online exam creation and grading.

Transport Management

Tracks school bus routes, schedules, and student transportation details, with options for GPS tracking and notifications.

Product Fact Sheet

School Management

Product Overview

School management software facilitates administrative tasks like student enrollment, attendance tracking, grading, and communication. It streamlines operations, enhances collaboration, and improves efficiency for educational institutions.

PRODUCT FEATURES

Inventory Management

Manages school inventory such as books, uniforms, and equipment, with features for procurement, stock tracking, and replenishment.

Staff Management

Manages staff profiles, attendance, leave requests, and payroll processing, with options for role-based access and permissions.

Reporting and Analytics

Generates various reports and analytics on student performance, attendance trends, financials, and other key metrics for informed decision-making.

Integration Capabilities

Integrates with other school systems such as accounting software, learning management systems (LMS), and student information systems (SIS) for seamless data exchange and workflow automation.
